OUR VISION

A Center of Excellence exploring new frontiers in the realm of education for nation building.

OUR MISSION

- To inculcate values in students so that we will have socially, intellectually, emotionally, spiritually and morally upright citizens.
- To provide them with a conducive environment to infuse a sense of responsibility, self-discipline and integrity.
- To promote creative thinking of the students so that they may excel in society and become capable to face challenges in life.
- To love mother earth and to have an awakening of a new conscience for sustaining the integrity of humanity and creation.

OUR MOTTO

Learn Today Lead Tomorrow.

Annual Pedagogical Plan

Session 2021-2022

Number of Students on Roll (Class – Wise)

Class	Nur	LKG	UKG	I	II	III	IV	V	VI	VII	VIII	IX	X
Number of Section	3	4	4	4	5	5	5	5	4	3	3	2	1
Students on Roll	62	134	161	180	203	222	192	190	157	120	101	68	35

Key Strengths of the School

- NON-PROFIT MOTIVE INSTITUTION
- LOVING AND CARING ENVIRONMENT

Staff Details: -

The number of the teachers including Librarian, PET, Counsellor/Special Educator, Music & Dance Position and Art & Craft in Position (Regular, Temporary & Part Time).

Annual Pedagogical Plan

Session 2021-2022

Name of Resources	Segment/ Primary/Sec	Usefulness
Smart Classes	All three segments	Primary, middle, secondary students learn everything easily with the help of smart classes
Science lab	Secondary Level Middle Level	Enhances mastery of science subject develop scientific reasoning abilities ,develop practical skills ,develop understanding of nature of science cultivate interest in science
Computers	All Segments	It helps students to develop the knowledge about the current technology.
Reference Books	Middle and Secondary	Students acquire knowledge
Library	All Segments	To develop reading habits
Maths lab	All Segments	Students acquire logical knowledge
Creative Hub	All Segments	Students acquire logical knowledge

Annual Pedagogical Plan

Session 2021-2022

Institution's Goals

Expand School Facilities

Economic crisis and world hunger are recognised as some of the greatest global challenges. St. Peter's Convent School is preparing to take collective measures to handle these challenges. Our school has planned to implement school based environmental policy with the objectives to create awareness about these worldwide problems. We aim to lay a strong foundation for each of the students to own a self- supporting personal attitude blended with compassion for the less privileged. We will promote social welfare and enlighten our students on environmentally sustainable art of living. Initiatives will be taken to imbibe the feeling of responsibility towards protecting our environment as well. In collaboration with staff and students, the school will execute various measures to use resources effectively.

Inter- active relationship with Collaborators.

Annual Goal	<ul style="list-style-type: none"> • To create student friendly learning environment. • To provide joyful learning experience by innovative pedagogy. • To assure better academic results • To put emphasis on Art Integrated Learning (AIL) model for providing an equitable learning environment for all learners. • To motivate students towards social responsibility • To excel in extracurricular activities.
Strategies	<ul style="list-style-type: none"> • Strategies predetermined earlier will be continued with certain necessary amendments. • Remedial classes will be arranged for the academic improvement of the slow learners.
Long Term Goal	<ul style="list-style-type: none"> • Enhancing and supporting the implementation of Teaching Learning Process • Providing school specific resources for TLP
Annual Goals	<ul style="list-style-type: none"> • Formation of School Environmental Policy • Reasonable use of Electricity • Go green & Save Environment • Conserve Water. • Parent- Teacher Meeting.

Annual Pedagogical Plan

Assessment

Purposes of Assessments

- A) To identify the children's learning needs;
- B) To help the teacher plan educational programmes for the children;
- C) To indicate which specific educational objectives have or have not been achieved;
- D) To serve as continuous evaluation

Process in Assessment:

- A) Identifying the children's learning needs;
- B) Assessing the children's baselines in specific subjects and establishing their pre-requisite skills;
- C) Setting learning objectives;
- D) Implementing curriculum programmes;
- E) Evaluating the effectiveness of Curriculum programmes and making adaptations to curriculum programmes.

Assessment Flow Chart

The following flow chart will be used to illustrate the assessment process.

Methods of Assessment

When evaluating the children's performance in terms of specific criteria set, the teacher will analyse the curriculum and the method of instruction used before he/she can develop appropriate assessment to identify the children's learning needs.

The assessment will be in the form of checklists, paper-pencil tests, interviews or observation of the children engaged in activities. They should be individually administered both at the beginning and at the end of the teaching period, so that the children's progress can be measured. The assessment results will then reflect the children's strengths and weaknesses.

Assessment is thus an important part of the teaching process.

Value education has been mainly expressed in terms of development of values and virtues like honesty, self-control, respect, responsibility, loyalty for personality/character development of the individual person without situating them in the prevailing social cultural realities and conditions.

Annual Pedagogical Plan

Values should not be treated as ideal concepts but as 'empowering tools' which are helpful in meeting the challenges of the contemporary social world -be it religious fundamentalism, environmental degradation multicultural conflicts, misuse of Science and technology, inequalities, ill effects of mass media, globalisation, commercialization and so on.

From broader perspective, the aim of value education is linked with the fundamental question of what education itself is meant for. From individual's perspective, the purpose is to enable students achieve personal fulfillment for success in life and work.

From societal perspective, education aim is to prepare young people to contribute to the society/Nation and world around, in neither case however, education is to be perceived as an outcome but as an experience in itself which will enable student to life to live safe, healthy and fruitful life and become responsible citizens who make positive contributions to the society.

Subject Enrichment Activities

These are subject specific activities aimed at enhancing the understanding and skill of the students. These activities are to be carried out throughout the term; however ,they should be evaluated at the term end.

Languages:

Aimed at equipping the learners to develop effective listening and speaking skills. The language teachers will device their own method and parameters for assessment of the language .

Mathematics:

For the activities in mathematics,practical work and activities in math's will be undertaken as suggested by the NCERT syllabus and textbooks

Science:

Practical work and activities in Science will be undertaken as suggested by the NCERT syllabus and textbooks.

Social Science:

Map of the project work will be undertaken as suggested by the NCERT syllabus and textbooks.

Annual Pedagogical Plan

Annual Pedagogical Plan

Guidelines for Implementation of the Plan

- Ensure grade wise,subject wise and unit wise detailing of the innovative pedagogy to be used through preparation of structured lesson plans.
- Develop content related to art, sport and ICT with education, with the help of concerned teachers as well as Art, Sports and ICT teachers.
- Ensure dissemination of plan to all teacher sandal concerned by June every year.
- Ensure proper implementation of this plan.
- Monitor the progress atleast on a monthly basis.
- Reach out to the Board for any training needs.
- Maintain records of the preparation of the plan, and the progress in the implementation.

Annual Pedagogical Plan

WHOLE SCHOOL RUBRIC					
Elements	LEVEL 1		LEVEL 2	LEVEL 3	LEVEL 4
Teaching and Learning	Personalized learning	Knowledge and understanding of how students learn is demonstrated by a minority of teachers	Knowledge and understanding of how students learn is emergent in teacher practice. Individual and/or teams of teachers are planning new approaches to teaching and learning.	Knowledge and understanding of how students learn is demonstrated by the majority of teachers. Most teachers have developed and implemented practices that put students at the centre of the learning process.	Knowledge and understanding of how students learn is evident in the practice of all teachers through a broad repertoire of student-centred teaching strategies and assessment methods
		Initial work is being undertaken to gather data on the individual learning styles of students at a year level	Data on the individual learning styles of students has been used to inform planning for the way in which teaching practices can be aligned to the learning needs and goals of individual students.	Pedagogical practice is informed by data and aligned to the learning needs and goals of individual students at certain year levels	Pedagogical practice is aligned to the learning needs and goals of individual students across the whole school
	Curriculum	Curriculum is usually designed by individual teachers based on the year level and associated subjects.	Teachers plan together to provide consistency of curriculum that reflects the stages of learning and student backgrounds and addresses the needs of particular cohorts of students.	Curriculum planning and practices reflects the achievements of students in relation to the standards for some domains, stages of learning and student backgrounds and perspectives.	All curriculum planning and practices analyses and addresses the full range of learning needs of individual students providing coherence, balance and continuity across all of the domains.
		Domains are connected in an ad hoc manner when planning learning experiences.	Domains are being combined when planning learning experiences for students.	Many of the domains are strategically integrated creating quality learning experiences for students.	All domains are interwoven in a sophisticated way in the design and delivery of a cohesive curriculum for all students.
		Curriculum planning and practice for cohorts of Students is undertaken as something separated from System Frameworks and the School Strategic Plan.	Any discrepancies between current priorities in the School Strategic Plan and System Frameworks have been identified.	Whole school curriculum planning and practice demonstrates the interconnectedness between the School Strategic Plan, System Frameworks and school improvement.	Whole school curriculum planning and practice is based on the local context and interconnects with the School Strategic Plan and an agenda of continuous school improvement.
		Students require structured support to develop the necessary knowledge and skills to	Teachers provide support for students to monitor and manage their learning.	Students have opportunities to monitor and manage their learning through structured	All students are equipped to monitor and manage their learning.

Annual Pedagogical Plan

	manage and monitor their learning.		support.	
	Assessment for teaching (for, of and as learning) is not explicitly planned. Assessment of learning (summative) remains the focus.	Assessment for teaching (for, of and as learning) is being planned with a focus on identification of effective assessment strategies.	Assessment for teaching (for, of and as learning) is planned for at the whole school level and for cohorts of students using a range of data. Parents and students receive regular information on strengths and areas for improvement/future learning.	All teachers use assessment for teaching (for, of and as learning) to provide individualized learning. Learning portfolios enable ongoing information sharing between teachers, students and parents. Evidenced-based valid and consistent judgments are made through moderation.
Organisational Structures	Current organizational structures all limit flexibility within student groupings and roles and responsibilities of teachers. Student learning and welfare are managed separately.	Current organizational structures are being examined and options are developed and analysed to identify structures that will better support student learning.	Flexible organisational structures are being implemented for aspects of the learning program and/or particular groups of students.	Organizational structures enable learning to happen in a range of places at a range of times through flexible use of people, IT and spaces.
Performance And Development Culture	Learning spaces are confined to the classroom and there is limited use of ICT to support student learning.	A needs analysis informs future developments of physical and electronic learning environments.	Some spaces have been reorganised to create physical and electronic learning environments that support student learning.	All physical and electronic learning environments have been created that complement diverse student learning.
	Professional learning is fragmented and usually short term.	Protocols have been established to increase the effectiveness of professional learning including the importance of reflection on practice.	Teams of teachers plan for learning opportunities that will meet their needs as a group.	Professional learning in collaborative teams focuses on exploration and sharing of learning and teaching practices to continually improve student learning.
Community Building & Participation	The leadership team is exploring how to incorporate the System Frameworks in their school and beginning to raise awareness of these initiatives with staff and school community	The leadership team is building its depth of knowledge of the System Frameworks and beginning to structure opportunities for staff and school community to engage with these initiatives to facilitate whole school curriculum planning.	The leadership team has a deep understanding of the System Frameworks and has created structures and processes that support staff and school community to implement these initiatives.	The leadership team has a meta-view of the System Frameworks and provides clear direction for improving student learning that involves all staff, students and relevant aspects of the local community
